

Web developer

April 2018

We are looking for a talented and dynamic web developer to join the team in our central London office. You'll have at least 2 years' experience, preferably within a similar agency environment.

The workload is varied so ability to multi-task is a must. We want someone who really cares about the client journey and final result, not just getting the job done.

We're a small, perfectly formed team so shrinking violets need not apply. You'll have opinions and ideas you can passionately share with colleagues and clients, and as a keen problem solver you'll be able to come up with creative solutions to meet our clients' needs.

Responsibilities

- Write clear, efficient and high-quality code
- Work with internal creative teams to translate wireframes and designs into exceptional digital solutions
- Promote appropriate technologies and platforms, implementing quality software solutions to meet clients' needs
- Support account managers' where necessary with proposals and scoping documents
- Respond to client queries and issues – clear written and verbal communication is essential

Technical skills

- Solid experience of ASP.net (VB/C#)
- Understanding of MVC
- SQL Queries, triggers, functions, stored procedures and T-SQL for data extraction and development – RDBMS (Preferably SQL Server 2005+)
- Experience of .net based CMS (preferably Umbraco, Sitefinity)
- Experience of industry-standard technologies such as JavaScript, XML, AJAX, CSS, JSON, HTML, HTML5/Canvas UX, UI, JQuery, CSS, XML/XSLT, LINQ
- Understanding of mobile technologies and trends
- Someone who understands design concepts, typography, and delivering beautiful projects.
- Understanding of IIS
- Good Understanding Web Accessibility Standards
- Working knowledge of Adobe Experience Manager would be a distinct advantage
- PHP experience not required (but would be beneficial)

Salary

- Competitive – please include salary expectations with your application
